

Are You an IT MVP?

Signature-based defenses can't hold the line against attacks any longer. Organizations need to assemble their IT Dream Team to ensure they have the right solutions and players in place to defend themselves from even the most advanced attacks.

47%

of malware was missed by legacy AV solutions in Q2 2017.¹

68%

of people believe that new and unknown threats to their organizations have significantly increased.²

2017

has seen the highest volume of malware attacks to date.³

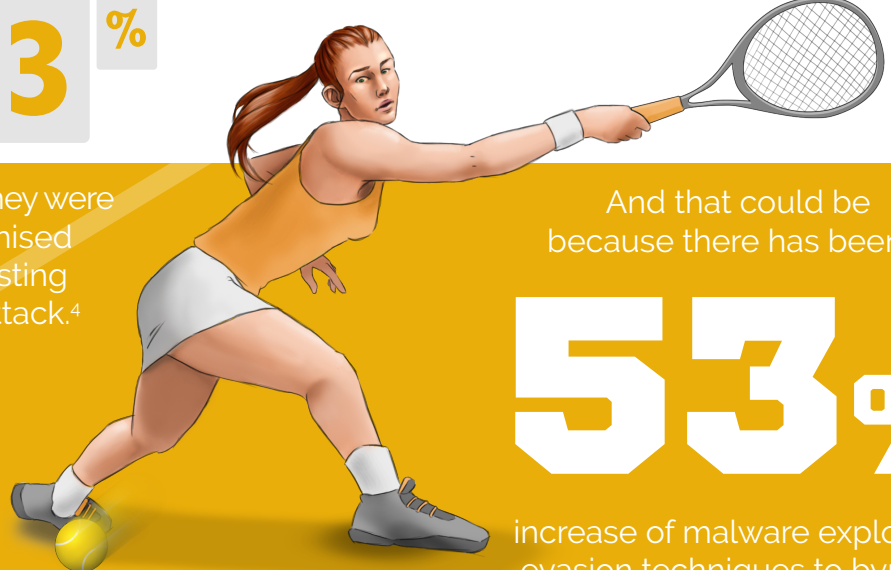

IN FACT

77%

of respondents believe that new or unknown threats have compromised their organization.

23%

believe they were compromised by an existing known attack.⁴

And that could be because there has been a

53%

increase of malware exploiting evasion techniques to bypass legacy AV.⁵

43%

 of cyber attacks target small businesses⁶

and could cost a small business or midsize enterprise over⁷

\$100,000

DO YOU HAVE THE

IT Dream Team

YOU NEED TO DEFEND YOUR ORGANIZATION FROM ADVANCED ATTACK?
