

AuthPoint Authentication Demo Instructions

Get up and running in minutes with AuthPoint in **3 easy steps**:

1

Download the
AuthPoint mobile app

2

Activate your token
Check your inbox for instructions in the
Activate Token email

3

Choose a password
by clicking on the link in your
Set Password email

Protect Cloud Applications (with Secure Single Sign-On!)

1. Start by going to the demo portal:

<https://authpoint.watchguard.com/demo>

2. Log in with your user name and password:

User name: *your email address*
Password: *defined during set-up above*

3. Authenticate! Approve the push notification that you receive on your AuthPoint app ...or deny it to see how easy it is to block an attack, should an unauthorized user get ahold of your credentials and try to access your account.

Note: Once you log in, you will see several applications; they are sample applications that are not configured, so *you won't be able to open them*.

Secure a VPN

1. Download and run the mobile VPN client app:

- Mobile VPN with SSL 12.2 for Windows
- Mobile VPN with SSL 12.2 for macOS

2. Use the following credentials:

Server: *tryauthpoint.watchguard.com*
User name: *your email*
Password: *defined during initial set-up*

3. Click '**Connect**'

4. Approve the push notification that you receive on your AuthPoint app
... or deny it to see how easy it is to block an attack, should an unauthorized user get ahold of your credentials and try to access your account.
